18. Yemen

DISEASE/PANDEMIC BAN LIST

The CDC has rated the following countries at Level 3; their highest rating. Because there are disease related health risks and travel assistance and evacuation services cannot be guaranteed, travel to the following countries is mostly restricted until further notice.

CDC recommends that travelers avoid all nonessential travel to China. There is an ongoing outbreak of respiratory illness caused by a novel (new) coronavirus that can be spread from person to person.

CDC recommends that travelers avoid all nonessential travel to Venezuela. The country is experiencing outbreaks of infectious diseases, and adequate health care is currently not available in most of the country.

Regardless of what is said here, it is the traveler’s responsibility to investigate the area to which he/she is going and assess the risks. Exceptions to this list may only be granted by the Rotary General Secretary.
